Experience

- **Oregon State University** — Corvallis, Oregon
  Assistant Professor of Teaching — *Sep. 2026 – Present*
- **Truist Financial** — Charlotte, North Carolina
  Senior Model Development Analyst — *Apr. 2025 – Jul. 2026*
- **Oregon State University** — Corvallis, Oregon
  Assistant Professor of Teaching — *Sep. 2024 – Mar. 2025*
- **University of Connecticut** — Storrs, CT
  Graduate Teaching Assistant, Dept. of Statistics and Dept. of Mathematics — *Aug. 2017 - Aug. 2024*
- **CRISIL** — Pune, India
  Senior Quantitative Analyst — *Jul. 2014 - May 2017*

Education

- **University of Connecticut** — Storrs, CT
  Ph.D. in Statistics; GPA: 4.09/4 — *Aug. 2019 – Aug. 2024*
  - Dissertation: *Lévy Processes driven by Telegraph Signal Process*
  - Major Co-advisors: Vladimir Pozdnyakov and Jun Yan
- **University of Connecticut** — Storrs, CT
  Master of Science in Applied Financial Mathematics; GPA: 4.05/4 — *Aug. 2017 – May 2019*
- **Indian Statistical Institute** — Kolkata, India
  Master of Statistics — *Jul. 2012 – May 2014*
- **Indian Statistical Institute** — Kolkata, India
  Bachelor of Statistics — *Jul. 2009 – May 2012*

Research Areas

- Stochastic Processes, Hidden Markov Models, Parametric Modeling, Adversarial Machine Learning, AI

Research Work

- Lévy Processes Governed by Telegraph Signal: Parametric Modeling and Numerical Estimation using Lévy processes such as Brownian process, Meixner process to describe movement while underlying state is governed by a telegraph signal. Code implemented in R-cpp and R. Ongoing work with a paper published in *Statistical Inference for Stochastic Processes*.
- Adversarial Machine Learning: Parametric Modeling of Success/Failure of Adversarial Machine Learning examples against defense ensembles or real world systems such as elections to then do Estimation of Parameters that represent relevant attributes. Ongoing work.

Publications (Google Scholar)

Eada, S. T., Pozdnyakov, V., & Yan, J. (2025). Discretely observed Brownian motion governed by telegraph signal process: Estimation and application to finance. *Statistical Inference for Stochastic Processes*, 28(1), 1.

E-Prints (not peer reviewed)

Kamal, K. M. A., **Eada, S.**, Verma, A., Acharya, S., Yemin, A., Fuller, B., & Mahmood, K. (2026). Analyzing Physical Adversarial Example Threats to Machine Learning in Election Systems. arXiv preprint arXiv:2603.00481, Eprint

Presentations

- Delivered an invited talk on "Brownian Processes driven by Telegrapher's process" at the New England Statistical Symposium (NESS) 2023.
- Delivered a workshop "Introduction to Python" at University of Connecticut Sports Analytics Symposium (UCSAS) 2021.

Awards

- H. Fairfield Smith and Dolores S. Smith Award for Excellence in Applied Statistics, University of Connecticut (2020)
- Certificate of Excellence for the Best Performance in Probability, University of Connecticut (2021)

Work Experience

- **Oregon State University** Corvallis, OR
  Assistant Professor of Teaching, Dept. of Statistics *Sep. 2024 - Mar. 2025, Sep. 2026 - Present*
  - Taught Sampling Methods (ST 431/531), Methods of Data Analysis (ST 412/512) and Time Series Analytics (ST 566)
  - Taught across both In-person and Online modalities
  - Taught slash courses that cater to both undergraduate and graduate students
  - Served on Graduate Admission Committee

- **Truist Financial** Charlotte, NC
  Senior Model Development Analyst *Apr. 2025 - Jul. 2026*
  - Worked in a model development role running exploratory data analysis, building credit loss forecasting models for the Comprehensive Capital Analysis and Review (CCAR) exercise in particular for the prime and sub-prime auto portfolios.

- **University of Connecticut** Storrs, CT
  Teaching Assistant, Dept. of Statistics and Dept. of Mathematics *Aug. 2017 - Aug.2024*
  - Accumulated a wealth of teaching experience over 14 semesters.
  - Held diverse roles including leading discussions, instructing a complete online course, and serving as the primary instructor for courses.
  - Taught across different levels (undergraduate/graduate) within both statistics and mathematics departments.
  - Served on Graduate Student Committee and was President of TARANG (South Asian Graduate Student Committee)

- **CRISIL** Pune, India
  Senior Quantitative Analyst *July 2014 - May 2017*
  - Credit Risk Modeling: As an outsourcing consultant for a US commercial bank, I specialized in model validation working for Comprehensive Capital Analysis and Review (CCAR) stress testing models. Here, I validated logistic regression models utilized for Probability of Default and fractional outcome regression models for Loss Given Default for HELOC and Auto loan portfolios. I also helped in responding to questions on validation during federal audit and excelled in a mentoring role.
  - Operation Risk Models: Detected inappropriate use of Poisson distribution, preventing underestimation of operational loss values for specific events.
  - House pricing models: Offered feedback in the inaccurate use of type of testing (Wilcoxon test instead of Wilcoxon signed rank test) that cut client spending, resulting in cost-saving.

- **Internships**
  - Institute for Mathematical and Statistical Innovation (IMSI), Storrs, CT, Summer 2021: Worked on Leaf Area and Yield Model where we Utilized a partitioning logistic module to study sorghum, evaluating yield by leaf weight per unit area. Determined actual yields and areas for optimal model parameters, comparing model predictions with real-world data. Explored various loss definitions, ultimately adopting a normed Mahalanobis loss to optimize parameters in the module.
  - Traveler's, Hartford, CT, Spring 2019: Collaborated on a semester-long experiential project to assess the impact of modern technology and direct-to-consumer channels on Traveler's primary distribution method, the "Independent Agency channel" and provide recommendations.
  - Deloitte U.S. India Ltd., Hyderabad, India, Summer 2013: Derived rules from the CHAID decision tree analysis to efficiently create appropriate customer segments for selling specific electronic products and rules to enhance cross-sale opportunities.
  - eClerx, Mumbai, India, Summer 2012: Developed training decks on linear regression and cluster analysis for onboarding new employees.

Personal

- Born in India to parents working as teachers and school administrators.
- I can speak 4 languages including English, Telugu, Hindi and Bengali and can write in three.
- Love Traveling and Sports.
- Have been to 36/63 National Parks in the U.S and traveled across the U.S. thrice.
- Had club membership with Badminton, Table-Tennis, Racquetball and Volleyball.
- Always keen to learn more from any of mathematical, engineering or creative side.
